

CURRICULUM VITAE

Federico ACCORNERO

Born in Asti-Italy on June 6, 1983

E-mail: federico@stu.edu.cn

EDUCATION

Doctoral Degree in Structural Engineering, Politecnico di Torino, Torino-Italy, 2014

Master of Science in Building Engineering, Politecnico di Torino, Torino-Italy, 2009

CURRENT POSITIONS

Associate Professor of Structural Mechanics, Department of Civil Engineering and Intelligent Construction, Shantou University, Shantou-China, 2023-present

PREVIOUS POSITIONS

Adjunct Professor of Structural Mechanics, SUISS-National School of the Italian Army, Torino-Italy, 2018-2023

Post-doc Fellow, Department of Structural, Geotechnical, and Building Engineering, Politecnico di Torino, Torino-Italy, 2015-2022

TEACHING ACTIVITIES

(1)“Fracture Mechanics of Concrete Structures”, 2023-present

Doctoral School, Shantou University, Shantou-China

(2)“Advanced Computational Mechanics”, 2023-present

Doctoral School, Shantou University, Shantou-China

(3)“Computational Mechanics”, 2023-present

**Graduate School of Civil Engineering, Shantou University,
Shantou-China**

(4)“Structural Mechanics”, 2018-2023

SUISS-National School of the Italian Army, Torino-Italy

(5)“Arch, Cable-stayed, and Suspension Bridges”, 2014-2016

Doctoral School, Politecnico di Torino, Torino-Italy

As assistant of Prof. Alberto CARPINTERI:

“Fracture Mechanics”, 2020

Graduate School of Civil Engineering, Shantou University, Shantou-China

“Fracture & Plasticity”, 2014-2023

Graduate School of Civil Engineering, Politecnico di Torino, Torino-Italy

COMMISSIONS OF TRUST

**(1)Member of the National Commission for the Assessment of the
Scientific Research Quality in Higher Education (VQR), Ministry of
University and Research, Italy, 2024-present**

- (2) Member of Commission WP 2.4.1 “Modelling of Fibre-reinforced Concrete Structures”, International Federation for Structural Concrete (FIB), 2022-present
- (3) Member of the Editorial Board, “Journal of Intelligent Construction” (Tsinghua University Press), 2023-present
- (4) Member of the Editorial Board, “Smart Construction and Sustainable Cities” (Springer), 2023-present
- (5) Member of the Topical Advisory Panel, “Buildings” (MDPI), 2021-present
- (6) Member of the Editorial Board, “Buildings” (MDPI), 2020-2021
- (7) Member of the Board, China Center, Politecnico di Torino-Italy, 2023-present
- (8) Member of the Scientific Committee, 8th World Congress on Civil, Structural, and Environmental Engineering (CSEE'23), Lisbon-Portugal, 2023
- (9) Member of the Organizing Committee, 2nd Italian Workshop on Shell and Spatial Structures (IWSS2023), Turin-Italy, 2023
- (10) Member of the Expert Panel of the Evaluation Committee for the attainment of the position of Lieutenant of the Engineering Corps (SPE, Permanent Service), Ministry of Defence (Italy), 2018-2019

INTERNATIONAL HONOURS AND AWARDS

- (1) Outstanding Talent Scholarship, Shantou University, Guangdong-China, 2022
- (2) Best-cited Paper Award, Curved and Layered Structures, De Gruyter, Berlin-Germany, 2022

(3) Top Downloaded Paper, Structural Concrete, Wiley, New Jersey, USA, 2021

SUPERVISION OF MSc THESES & PhD DISSERTATIONS

Supervisor of 27 MSc Theses in Civil Engineering (Topics: acoustic emission testing, masonry arch bridges, steel-bar reinforced, FRP-bar reinforced and fibre-reinforced concrete structures) and of two PhD Dissertations in Civil and Environmental Engineering (Topic: fracture mechanics of concrete structures)

SCIENTIFIC ACTIVITIES AND MAJOR ACHIEVEMENTS

H-Index (Google Scholar) = 16

Total Citations (Google Scholar) = 848

H-Index (Scopus) = 16

Total Citations (Scopus) = 734

Author of 78 publications, of which 43 are papers appeared in Refereed International Journals, on the following research topics: fracture mechanics, scale effects, reinforced concrete, masonry arch bridges, structural monitoring and fracto-emissions, membranes and shells, instability phenomena and hysteresis

RESEARCH TOPICS AND CUTTING-EDGE RESULTS

Different specific topics have been considered in the framework of fracture mechanics and structural engineering, always giving them a personal and original contribution, with an innovative focus on next-

generation reinforced materials. Among these peculiar aspects, it is significant to recall the following ones:

- (1)Investigation of the structural effects due to reinforcement, slenderness, and scale in the design of fibre-reinforced polymer bar (FRP-bar) reinforced concrete (RC) structures, leading to an effective development of innovative standard guidelines. In this framework, the transition between tensile cracking and compression crushing failures occurring in FRP-bar RC beams is described together with their structural ductility
- (2)Solution to the problem of minimum reinforcement in fibre-reinforced concrete (FRC) or hybrid-reinforced concrete (HRC) structures. Their behaviour is proved to be mainly influenced by fibre volume fraction and steel-bar reinforcement percentage coupled with their characteristic structural size. This dominant scale effect appears to be crucial to thoroughly understand FRC or HRC structural behaviour under flexural loading or low-cycle fatigue
- (3)Formulation of a comprehensive theoretical framework for high-performance prestressed concrete (HPPC) structures. The correct estimation of scale effects on minimum and maximum reinforcement percentages requires a thorough knowledge of the complex phenomena characterizing the tensile cracking and compression crushing failures, leading to define the field in which HPPC structures can develop a safe ductile behaviour. New standard requirements for an effective structural design are formulated

MAJOR INVITED PRESENTATIONS AT INTERNATIONAL CONFERENCES AND ADVANCED SCHOOLS

- (1) Distinguished Lecture on “Next-generation reinforced concrete structures”, National Facility for Earthquake Engineering Simulation, Tianjin-China, 2024
- (2) Invited Lecture on “FRP-bar reinforced concrete: Brittle behaviour and Fracture Mechanics assessment”, Department of Hydraulic Engineering, Tsinghua University, Beijing-China, 2024
- (3) Invited Lecture on “Next-generation reinforced concrete: Brittle behaviour and Fracture Mechanics assessment”, School of Civil Engineering, The Hong Kong University of Science and Technology, Hong Kong-China, 2024
- (4) Keynote Lecture on “Modelling fibre-reinforced brittle-matrix composites: Cohesive (single-phase) vs bridged (multi-phase) crack options”, 11th International Conference on Fracture Mechanics of Concrete and Concrete Structures (FRAMCOS11), Bangalore-India, 2023
- (5) Invited Lecture on “A fracture mechanics approach to the design of fibre-reinforced and hybrid-reinforced concrete beams”, Special Session “The use of fibre reinforcement for more durable, sustainable and resilient built environment”, FIB Symposium 2023, Istanbul-Turkey, 2023
- (6) Keynote Lecture on “Fibre-reinforced and hybrid-reinforced concrete: An updated Bridged Crack Model with softening pull-out forces”, 7th World Congress on Civil, Structural, and Environmental Engineering (CSEE'22), Lisbon-Portugal, 2022
- (7) Invited seminars on “Next-generation Reinforced Concrete”: (1) “High-performance Prestressed Concrete Structures”; (2) “FRP-bar

Reinforced Concrete Structures”; (3) “Fibre-reinforced or Hybrid-reinforced Concrete Structures”. College of Engineering, Shantou University, Guangdong-China, 2021

(8)Invited Lecture on “Influence of mechanical instabilities on acoustic emission signal processing in progressive microcracking coalescence”, 7th 269-IAM RILEM Meeting on Damage Assessment in Consideration of Repair/Retrofit-Recovery in Concrete and Masonry Structures by Means of Innovative NDT, Turin-Italy, 2019

(9)Keynote Lecture on “The Bridged Crack Model with multiple fibres: Scale effects and local instabilities”, 10th European Solid Mechanics Conference (ESMC10), Bologna-Italy, 2018

MAJOR RESEARCH GRANTS

The following research grants were coordinated as Project Leader:

(1)STU Outstanding Talent Research Grant N. 140-09423016, 2023-2026, 800k RMB (120k €)

SEGRETARIATO GENERALE
Direzione generale delle istituzioni della formazione superiore

N: 4447

Gent.le
Federico ACCORNERO
E-Mail: federico.acconero@polito.it

OGGETTO: ASN 2018/2020 - Attestazione di avvenuto conseguimento dell'Abilitazione Scientifica Nazionale alle funzioni di professore universitario di Seconda Fascia nel Settore Concorsuale 08/B2 - SCIENZA DELLE COSTRUZIONI.

Con la presente si attesta che Federico ACCORNERO, nato a Asti (AT) il giorno 06/06/1983 , ha conseguito, all'esito delle procedure di Abilitazione Scientifica Nazionale bandite con decreto direttoriale n. 2175/2018, l'Abilitazione Scientifica Nazionale alle funzioni di professore universitario di seconda fascia nel Settore Concorsuale 08/B2 - SCIENZA DELLE COSTRUZIONI.

La validità dell'Abilitazione è di dieci anni¹ a decorrere dal 11/01/2022 e avrà scadenza il 11/01/2032².

Roma, 29/04/2022

La Dirigente
Dott.ssa Maria Giovanna Zilli³

¹ Termine prorogato ai sensi dell'art. 6, co. 4 bis del D.L. 30 dicembre 2021, n. 228, coordinato con la legge di conversione 25 febbraio 2022, n. 15, recante: «*Disposizioni urgenti in materia di termini legislativi*».

² Gli elenchi dei candidati abilitati sono sempre consultabili sul sito <https://abilitazione.miur.it>, sezione “CANDIDATI E RISULTATI”, cliccando sull'anno della tornata di interesse, link “Risultati”.

³ Firma autografa sostituita a mezzo stampa ai sensi e per gli effetti dell'art. 3, co.2, D. Lgs. n.39/1993.

Il Responsabile del procedimento: La Dirigente Dott.ssa Maria Giovanna Zilli

We hereby certify that Federico ACCORNERO, born in Asti (AT) on 06/06/1983 , achieved the National Scientific qualification as associate in the Italian higher education system, in the call 2018/2020 (Ministerial Decree n. 2175/2018) for the disciplinary field of 08/B2 - Structural mechanics. (Academic Recruitment Field 08/B - Structural and geotechnical engineering, according to the national classification).

The validity of the qualification is ten years¹, starting from the 11/01/2022 and will expire on the 11/01/2032².
